# Training is our Business

Our main purpose is to ensure that training is assessed, planned, and delivered for the workforce who are serviced by the Southwest Region. Training is key to developing a successful organization. Our role as HR Specialists is to serve our customers and we look forward to working with each of you in developing a viable training program that will meet your installation or activity training requirements.

**The Road to  
Success Begins  
with Knowledge**

## Tailored Training Programs

Learning opportunities are available in a variety of methods to meet your training needs and budget.

We can help coordinate instructor-led training at your local site. And we can arrange for instructors to broadcast training to several regional sites via video teletraining to share course costs and resources.

With Army’s Distributed Learning Program, high quality training can

be convenient and cost-effective.
